

**Graphene heating painting by Shaanxi Huaqing Yifeng New Material Co. Ltd**

A combination of graphene heating layer and painting.

1200 CNY/ 1600 W

## **Graphene heating carpet by Shaanxi Huaqing Yifeng New Material Co. Ltd**

A product that combines the graphene heating layer with the carpet.

1600 CNY/ 1600 W

## **Graphene geothermal film by Shaanxi Huaqing Yifeng New Material Co. Ltd**

A kind of heating-technology who is waterproof and flame retardant, the product is in vacuum package, its service life is 50 years with low thermal attenuation rate.

## **SN grade gasoline engine oil by Xi 'an Tang Dynasty Huaqing Graphene Technology Co. Ltd**

1. It is made of graphene wafer with thickness below 3 nanometers and synthetic lubricating oil by professional formulation;
2. Obviously improve lubricity, reduce friction factor, improve fuel economy, prolong the service life of engine;
3. Significantly reduce engine noise, commission lubricating oil oxidation resistance, prolong lubricating oil replacement cycle.

## **SM grade gasoline engine oil by Xi 'an Tang Dynasty Huaqing Graphene Technology Co. Ltd**

- 1.It is made of graphene wafer with thickness below 3 nanometers and synthetic lubricating oil by professional formulation;
- 2.Obviously improve lubricity, reduce friction factor, improve fuel economy, prolong the service life of engine;
- 3.Significantly reduce engine noise, commission lubricating oil oxidation resistance, prolong lubricating oil replacement cycle;
- 4.good low temperature performance and mechanical shear stability, can be used in complex road conditions..

## **CJ-4 diesel engine oil by Xi 'an Tang Dynasty Huaqing Graphene Technology Co. Ltd**

- 1.It is made of graphene wafer with thickness below 3 nanometers and refined with high quality base oil, which has super lubrication and anti-wear performance and can effectively protect engine parts;
- 2.good high temperature oxidation resistance, effectively extend the service life of lubricating oil;
- 3.Excellent viscosity-temperature performance to ensure good lubrication of the engine in harsh environment;
- 4.excellent dispersion performance, always prevent carbon deposition and sludge, effectively reduce engine noise, improve fuel economy performance.

## General purpose lithium lubricating grease by Xi 'an Tang Dynasty Huaqing Graphene Technology Co. Ltd

- 1.This product is made of graphene wafer crystals with thickness less than 3 nanometers and saponified with a unique formula of grease, meeting all the physical and chemical properties specified by the national standard;
- 2.Excellent extreme pressure anti-wear performance, effectively prevent friction pair wear, pitting corrosion, prolong the service life of equipment;
- 3.Good high and low temperature performance, strong versatility;
- 4.It has good adhesion performance to ensure that the grease is not easy to be thrown out and lost when the equipment is running at high speed;
- 5.Good anti-rust performance, can effectively protect the equipment is not easy to rust;
- 6.Good mechanical stability, to ensure the stability of long time shear structure, to meet the need of long period of lubrication.

## Extreme pressure lithium base grease by Xi 'an Tang Dynasty Huaqing Graphene Technology Co. Ltd

- 1.This product is made of graphene wafer crystals with thickness less than 3 nanometers and saponified with a unique formula of grease, meeting all the physical and chemical properties specified by the national standard;
- 2.Excellent extreme pressure anti-wear performance, effectively prevent friction pair wear, pitting corrosion, prolong the service life of equipment;
- 3.Good high and low temperature performance, strong versatility;
- 4.It has good adhesion performance to ensure that the grease is not easy to be thrown out and lost when the equipment is running at high speed;
- 5.Good anti-rust performance, can effectively protect the equipment is not easy to rust.

## **Anti-wear hydraulic oil L-HM46 by Xi 'an Tang Dynasty Huaqing Graphene Technology Co. Ltd**

- 1.This product is made of graphene wafer with thickness less than 3 nanometers and high quality base oil combined with independent formula.
- 2.Excellent anti-wear performance, can effectively extend the service life of the equipment;
- 3.Excellent thermal stability and oxidation stability, effectively extend the oil change cycle;
- 4.With good anti-foam and air release;
- 5.Good low temperature performance, high shear stability.
