

Thermoformable PET

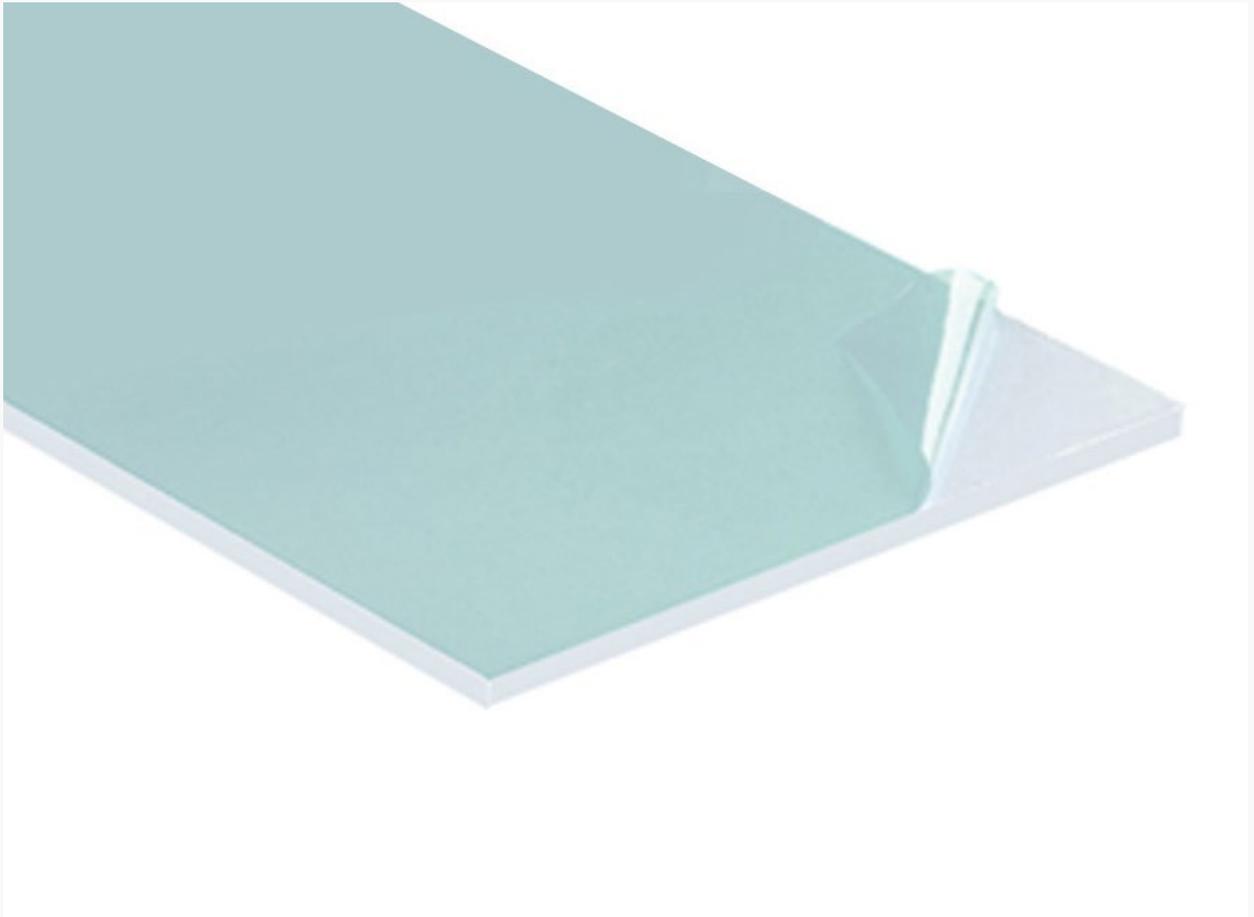

Suitable for use in automotive, white goods, consumer electronics and In-Mold Electronics

Halogen-free, Flame Retardant (VTM-0) clear film

Black PET film for Flexible Printed Circuit (FPC) boards

Melinex[®] PCS

Melinex[®] PCS is an optically clear, polyester (PET) film with a protective layer on one surface. The protective film layer prevents external contamination of the underlying polyester film surface, and allows easy transportation and handling of the film prior to further processing. Removal of the protective film reveals a clean, uncontaminated polyester film surface. Also available with UV properties (Melinex[®] PCSUV)
