Coatema Click&Coat

Maximum Modularity and Flexibility:
Coatema Click&Coat is a revolutionary concept for an endless number of process variants.

Coatema's revolutionary Coatema Click&Coat concept leaves the fixed processes of obsolete pilot machine behind. For an unlimited range of individual components that can be put together easily Coatema Click&Coat is the answer.

Interchangeable Coatema coating heads and individual downstream components can be quickly assembled to create exactly the inline processes required. The Coatema Click&Coat control technology and flexible cabling were developed especially by Coatema to provide maximum flexibility.

Coatema's tried and tested Coatema Click&Coat machinery concept can be customized from more than 30 different process modules. This offers a whole range of configurations that can be combined to create a pilot or full production line that meets the most exacting requirements for performance and quality.

Coatema offers the Coatema Click&Coat concept in working widths od 300 mm, 500 mm and 1,000 mm.

An extensive range of Coatema Click&Coat elements can be tested at the Coatema R&D centre in Dormagen, Germany.

Coatema Easycoater

For Sheet-to-Sheet coating:
The Easycoater (third generation) is a discontinuous high-tech coating machine for Sheet-to-Sheet coating.

The Easycoater is designed to produce high quality products or samples in DIN A4 up DIN A0 quickly and reliably. A slot die, doctor blade, and flat screen-printing unit are available and many additional coating systems can be integrated.

Coatema Smartcoater

The versatile Roll-to-Roll laboratory platform for printing, coating and laminating: Quick adjustment of modular coating systems.

The Smartcoater is a unique laboratory machinery that can reproduce complex processes in a variable compact form. The Smartcoater is suitable for experienced users and newcomers to coating, printing and laminating technologies.

With working widths up to 300 mm, standardised assemblies and a modular layout the Smartcoater is a fast, cost-effective laboratory or small pilot production tool.
